

Dear Sir / Ma'am,

Good day!!

I'm **REA GRACE LEONARDO AQUINO**, I was born on 17th of May 1982, 26 years of age and currently moved here in Taiwan for work. I'm the 7th in the family. I have 4 brothers and 2 sisters. Four of my siblings were already married. While my 2 sisters and I are still single and all of us are employed here in Taiwan. My father was passed away due to Cardiac Arrest 2 years ago. That was the painful moment in our lives but we realized that we still need to move on.

During my High School days I was very active in our clubs and different kinds of organizations. I thoroughly enjoyed my days and found many ways to excel. I was a varsity in volleyball and a swimmer too. I joined in all the activities that may added with extra curricular in our school. I had a Part time job despite my hectic schedules and duties and yet I still managed to graduate with honors.

After I finished my High School, I decided to work first because my parents couldn't afford to send us all in college at the same time. I was employed in Jollibee Food Corporation as a Service Crew. Then on the following year, I was hired also in Cirtek an electronics company in the Philippines as a production operator. I worked there for almost 2 years until I promoted as a line leader. Then, I had the opportunity to enroll in College. I worked in the evening and attended class in the morning.

April 2005, When I satisfactory completed my certificate in Associate in Health Science Education. In my required summer classes in Nursing course, I started went to intern in different appellation. On my first year of

internship, I learned a lot of things in medical field such as taking and giving care for the patients, medicating, took vital signs, did the life support, volunteered in community services, we went in different institution like in the home for the aged and nursing homes. Being assigned in different areas such as pediatric ward, nursery room, ward operating and emergency room, especially teach in nursery and kinder was pretty enjoying. Unfortunately, I wasn't able to finish my study because my father then was already sick and we don't have enough money to continue my education. Thus, I just decided to work for abroad.

In year 2007, I was employed here in Taiwan as a Production Operator in one company. But due to global crisis, many electronics company were shut down. Our company is a little bit affected therefore oftentimes that we don't have work and overtime. Luckily, I have a Taiwanese friend that offered me to be a Nanny of her kids. During my off I'm going to their home to look after of the 2 girls. I prepare their meals or snacks, get them ready to the school, teach them to do their home work, tutoring, bathing, provide interesting activities and do the household tasks too.

I hope you enjoyed in reading my letter like the way I enjoyed of writing it for you. I hope that you could give me a chance to work in your family and prove how a good caregiver I am.

Thank you and Have a nice day!!

Sincerely Yours,

Rea Grace L. Aquino
