

Dear Sir/ Madam,

I am Psyche M. Butawan, 24 years old and a citizen of the Republic of the Philippines. I am the 2nd child of the family among 5 children. I took up my elementary and secondary education in my hometown of Ubay Bohol, Philippines. Undergraduate of my course Bachelor of Science in Computer Science in Holy Name University Tagbilaran city. I undergo caregiver course training for eight months and was given the certificate of completion last December 2004.

Poverty gives me the courage and determination to work abroad in order to support my family needs and help my parents for a better living. I had my first job as domestic helper last August 2006 in Macau serving Chinese people. I have been working with my employer for 3 years and 2 months now and still working at present with them.

When I came in their house the kid is still 4 years old at that time and my boss is expecting her 2nd baby. The kids now are ages 7 and 3 years old and both of them are girls. My duties and responsibilities are providing care for 2 children, light housekeeping, doing the laundry and meal preparation for the family.

Low salary in Asia pushed me to apply another job in Western country and serve Western people if I will be given the opportunity. I am responsible, hardworking and I will do my best effort and knowledge of my profession as a caregiver. Enclosed is my full resume for reference. Thank you for your kind attention and I am looking forward for an interview any time convenient to you.

Yours faithfully,

Psyche M. Butawan
