

And I regularly check up her blood sugars. I am also the responsible in cleaning the entire house, do the laundry and occasionally I am going to market.

Working in Canada is every Filipino caregiver's dream, like me I really want to have a decent job in Canada to have a new experience, to learn a new culture which I believe it is very far different here in Taiwan. I also want to work in Canada to apply my ability and knowledge from my training and experiences to that certain work. And lastly I want also to live in Canada.

I am an extrovert person I always go out with a couple of friends, and my friends describe me that I am funny, nice and happy to be with. They also say that I am a jack of all trade.

Mixing appropriate ingredients or flavors into a pot and come out with a good taste or cooking is considered as my strength specially the Taiwan and Filipino dishes.

For fun when I am still in Philippines I joined some social organizations and going out with friends playing, singing and eating together near a beach or under the trees. For now that I can't go out what I am enjoying to do here is reading and listening music and also writing letters to all my friends.

For you Sir and Maam I expect that I will meet your expectation to me and I expect that I will satisfy you for my services.

I also expect that you are kind enough and understanding employers.

For my future plan I want to live also in Canada with my brothers who are left in Philippines and run my business a food chain and game cafe.

Sir and Maam this is all about me. Thank you very much for spending a time to read my letter.

May you stay in Faith.

God speed.

Very truly yours,

Arlene L. Alejo
