Sir / Ma'am,

Good day and my warmest greetings of peace & love!

It is a great pleasure to introduce myself to you and your family. I am Jonna Liza Bongeng, 26 years old single & a Filipino citizen, a resident of the Philippines and currently working in Taiwan. I am the 2nd eldest of 8 siblings with 2 brothers and 5 sisters.

I grew up in a poor & big family, my parents worked as farmers who can only provide our basic need in hand to mouth basis, as of now my parents retired in working coz of physical problems but although we lived in poverty I am still proud to inform you that my family was a happy family regardless of our situation. I have a parents who are very kind, caring, loving, understanding & very supportive. The only thing I am very regretful was I didn't grow up at the side of my parents & siblings, because after my grades school I need to depart from my parents as well as with my 2 sisters to be able to continue in pursuing our education. Due to our necessitous circumstances we need to be sheltered from our relatives who are willing to support us in our education. My 2 sisters stayed with my aunt miles away from home and for that, almost 8 to 9 years before we've seen each other. For me I stayed with my cousin & her family who were very generous in supporting me in my education so in return to their generosity I did my best to look after their daughter who was then 6 yrs old and do some of the house^{work} works, I stayed in their family until I graduated from college & during my college days and I am free I will do some extra income to finance some of my personal belongings as well my school requirements/projects. I worked as a baby-sitter to my other cousins kids & sometimes I'll do some laundry & cleaning in our local parish convent to earn some money, although my life in my college days was a little bit complicated in terms of financial matters but I still enjoyed & happy with all my experienced because it helped me to be a strong person & to boost confidence to believe in myself. I am very thankful that I was surrounded with people who were very supportive, kind & caring, so with my sacrifices, perseverance, determination and eagerness to learn I was able to finished my college education.

So after school, it was my turn to help my family especially to the education of my younger brothers & sisters especially now that they needed my financial support because 4 of them are in college. To be able to help them financially I need to get out from my country to find a job since there is a little chance in getting a job back home, so right now I am working in Taiwan as a domestic helper but actually I was hired as a caretaker, my employers have 3 kids aged 18, 16, 12 and I have also 2 elderly here at my work place but still they are strong so I focus my work as a house keeper. As a house keeper, I do all around works like washing the clothes, dishes & care, ironing the washed clothes. I do also cooking and most of all I need to make the house clean all the time, so everyday I clean these
