

Dear Employer,

My name is Evangelyn Bejarin, 39 years old, a registered nurse from the Republic of the Philippines and is currently working in TZU KUANG NURSERY HOUSE ,Chang Hua County,Taiwan R.O.C, as a Nursing Aide.

I came from a big family, the youngest of the seven children. I grew up in Pitogo Quezon wherein my family's income came from crops. Everyone in our family has a part in helping out our parents. My five brothers help out in the field while my sister and I take care of the household chores. All of us grew up well disciplined and helpful because that's what our parents thought us and because I came from a big family, I learned how to be flexible and managed to always find a common ground with other people to avoid disagreements.

I am always on time in every appointment; I do not want to let other people wait. I see to it that I will do whatever I promised/said. I have a very compassionate heart and I don't take things personally, I am kind in nature but can be firm and strict when the situation calls for it. I handle stress very well and do not let it or anything get in the way of my work. I love to take care of other people specially those who cannot take care of themselves. I am a friendly person and will always put anyone at ease and comfortable because I love to have a harmonious relationship with everyone. I always feel the need to care for others as if it is my calling and the real purpose of my being. I always love to have a conversation with my patients. To give them advice when they asked for it and simply just to listen when they want me to, I always put their needs.

What I love most about this job is the satisfaction that I get deep within me when I know that what I am doing helps someone who cannot help him/herself do it alone. To care for other people is a great achievement that anyone can offer. It is the only satisfaction that I have always craved for. I love and always will love to give assistance to those who cannot do it on their own. I'd like to be of great help to their recovery, and to their lifetime if needed. I am a domesticated person and can handle different tasks at once. I am very organized, I see to it that my workplace & personal space or the environment that I am in, is always clean and orderly. I am observant and able to recognize when something is wrong. I am understanding and will not judge my employer neither my patient. I can listen and be an effective mentor for the family members. At times they will be a person to go to for information and will be expected to have the answers or if not - to point them in the direction to get the information they need. I am a person who can take care of you when you are ill and usually at your worst and in spite of that offers you services that are badly needed.

I love taking care of children too. When dealing with children, I am patient but firm with them. I do not lay a hand on any child instead I help the child understand the right manner of dealing with things.

Sincerely,.

Evangelyn T. Bejarin
