TO WHOM IT MAY CONCERN:

Sir/Madame;

I am Freda Gorosky, 97 years old and a widow. I am suffering from high blood pressure and glaucoma in which causes me not to see well.

And with this sickness I needed someone to take good care of me, to assist me in everything I do, from eating to taking my pills on time, for my health and sanitation, for cooking, going out for my check-ups and therapy and other small things that I have and I needed to do in and out the house.

All this are performed by my caregiver Ms. HAYDY E. HENRY, a Filipino. I am very satisfied with her work and performance in taking care of me. She has the initiative to do things more than what she is expected to do. She is very honest, responsible, punctual, very neat and clean, God-fearing and most of all trustworthy because with my sight condition she never give me or my family any doubts to complain.

She's been working for me for almost 5 years now and I am very happy and very satisfied with her.

I hope you will too.

Sincerely,

FREDA GOROSKY
