to all who need

Letter of recommendation to Kopila Thapa

Kopila has been working for two and a half years, looking after my mother, until she had to move to a medical institution, a parents home, while she is suffering from dementia.

I have been living near my mother and responsible for her treatment. During this period of time I had a chance of knowing her as a worker and as a young woman.

Kopila is a very devoted responsible person, honest, initiative and diligent.

Kopila created warm human contact with my mother. She has never been missing or late to work.

Kopila speaks Hebrew and English well, through our conversations I met an intelligent interesting person.

We are sorry to say good buy to her, and sure every employer will enjoy her work.
